DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15 and 20-25, drawn to a method (and apparatus) of calculating power supply network analysis and the size of an IC core, classification in 716, subclass 5.
 - II. Claims 16-18, drawn to a method estimate the size of an IC core by calculating the area of the circuit block, the wiring area, and the repeater cell area, classification in 716, subclass 10.
 - III. Claim 19, drawn to a method of estimating wiring capacity, classification in716, subclass 5
- 2. Inventions Group I, Group II, and Group III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention combination as claimed does not require the particulars of subcombination as claimed because Group I is combination of method (and apparatus) of calculating power supply network analysis and the size of an IC core, The subcombination has separate utility such as Group II, a method estimate the size of an IC core by calculating the area of the circuit block, the wiring area, and the repeater cell area, this method is separately patentable from Group II, because This method is including the repeater cell area calculation; and Group III is a subcombination of Group I and Group II, and It has

Art Unit: 2825

separate utility such as a method of estimating wiring capacity which is part of determining the size of the IC core. See MPEP § 806.05(d).

- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nghia M. Doan whose telephone number is 571-272-5973. The examiner can normally be reached on 8:30-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jack Chiang can be reached on 571-272-7483. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
